

SUYU (JIMMY) WANG

Toronto, ON | +1 437-362-2306 | ruajimmy133@gmail.com | linkedin.com/in/suyu-wang-b6a58a364

Management Analytics candidate with experience in data analytics, risk modelling, and AI-enabled product development. Skilled in Python, R, SQL, machine learning, and data visualization, with a track record of translating complex requirements and data into practical business solutions. Seeking data, risk, or business analytics opportunities.

EDUCATION

Rotman School of Management, University of Toronto
Master of Management Analytics

Toronto, ON
Expected Feb 2028

University of Toronto

Toronto, ON

Honours Bachelor of Science, Double Major in Statistics and Economics, with Distinction

Jun 2026

Relevant Coursework: Probability & Statistics, Time-Series Analysis, Multivariate Data, Machine Learning, Financial Economics

PROFESSIONAL EXPERIENCE

Capgemini

Shanghai, China

Data Analyst Intern

Jul 2026 - Present

- Analyzed 4,288 dealer accounts across 84 CRM features; developed a WOE-logistic scorecard and benchmarked Logistic Regression, Random Forest, and GBM to segment downgrade risk.
- Designed a Customer 360 decision-workbench prototype that surfaced 716 high-value accounts; built 15+ Python scripts and governance checks using PSI, IV, calibration, and significance tests.
- Led the CG Bot project group and authored its BRD, translating enterprise policy-management needs into ingestion, evidence-backed Q&A, and governance journeys; coordinated team workstreams and owned the M4 FAQ and M7 operations-platform scope.
- Contributed across Vue 3, Python/FastAPI, and SQLite to policy versioning, semantic retrieval, tiered memory, human escalation, and governance workflows; coordinated end-to-end validation, defect closure, rollout adaptation, and delivery documentation.

GenAI Learning Behavior Analytics

University of Toronto

Research Project

Jun 2025 - Jul 2025

- Analyzed 10,000+ AI-assisted learning sessions and engineered prompt-strategy, engagement, and outcome features.
- Applied chi-square tests and logistic and linear regression to identify gains from iterative prompt refinement and diminishing returns from excessive prompting.
- Translated findings into recommendations for prompt-literacy instruction and evidence-based design of AI-supported learning systems.

Alpha Libertée

Toronto, ON

Data Analyst Intern

May 2025 - Jun 2025

- Collected and cleaned public Airbnb listing data across four Canadian cities; engineered price, seasonality, rating, cancellation-policy, and review features for statistical analysis.
- Built an R linear-regression model explaining nightly prices and identified rating, geography, and cancellation flexibility as significant drivers; converted findings into pricing and positioning recommendations.
- Analyzed 3,788 consumer records for a fitness-supplement study and compared regression, Random Forest, and Decision Tree models to assess product and behavioral drivers of performance outcomes.

Henan Luozheng Pharmaceutical Co., Ltd.

Luoyang, China

Data Analyst Intern - Pharmaceutical Sales

May 2023 - Aug 2023

- Cleaned and analyzed regional pharmacy sales and pricing data to evaluate price sensitivity, demand variation, and inventory risk.
- Produced visual reports and a regional allocation proposal to support pricing, procurement, and product-distribution decisions.
- Recommended differentiated inventory allocation by regional demand to improve supply efficiency and reduce overstock exposure.

SELECTED PROJECTS

JimmyAI - AI-Powered Research Knowledge System

Independent Project

Product Owner & Developer

Jul 2026 - Present

- Developed a private research knowledge system and designed its server-side architecture for durable source storage, versioned processing, evidence-linked retrieval, and governed publication.
- Designed 20 reusable workflow Skills for literature analysis, code-repository auditing, job-search operations, report generation, and deterministic project governance.
- Applied AI-assisted software development to translate requirements into working automation, then added source traceability, duplicate detection, approval gates, and regression-tested quality audits.

Toronto the Lonely - Mental Health & Civic Vitality Dashboard

University of Toronto

R Shiny | Geospatial Analytics

Jan 2026 - Apr 2026

- Built a team-based interactive R Shiny dashboard integrating 158 Toronto neighbourhoods, 25 wards, and 61 mental-health facilities to map crisis burden, civic vitality, and service-access gaps.
- Designed linked choropleths, scatterplots, facility overlays, filters, and adjustable weights; created service-accessibility and composite priority metrics for scenario analysis.
- Ranked the top 10 neighbourhoods for potential support-centre investment, turning multi-source public data into a transparent decision-support workflow while documenting key limitations.

TECHNICAL SKILLS

Programming & Data: Python (Pandas, NumPy, scikit-learn), R (tidyverse, ggplot2, Shiny), SQL, Git

Data Science & Machine Learning: Regression, classification, Random Forest, gradient boosting, feature engineering, time-series forecasting, PCA, K-means

Statistical Methods: Hypothesis testing, experimental design, bootstrap, multivariate analysis, model monitoring

Visualization & AI: Tableau, Power BI, R Shiny, Matplotlib, Seaborn, NLP, RAG, LangChain, AI-assisted software development

Languages: Mandarin (native), English (professional), Japanese (basic), French (basic)
